

1900 Ramblers Are Here . .

Out of sight too, regular beauties. We received but 20 by this "Australia," all the S. F. house could spare on account of the great demand there. Call and see what a 1900 Rambler looks like and you will want one, but come soon as several are sold to arrive and as we had no stock when these got here 20 will not last long.

Repair Work

This is our strong point as we have the best repair man in the Islands and are thus able to guarantee our work. We undertake any kind of bike repairs, no matter how badly a wheel is smashed up we can make it as good as new. We know we are not located well at present and our customers and selves are put to a good deal of inconvenience, but a good start has been made on our new quarters and after a few months we will show you bicycle and sporting goods quarters that will be a credit to any city in the U. S. In the meanwhile we will have to hoonanawanui, if the next Australia brings us what we have ordered in the wheel line we will have something interesting to tell you when she comes. When you want to rent a wheel come to us.

E. O. HALL & SON, Ltd,
Cor. Fort and King Sts.

BY AUTHORITY.

IRRIGATION NOTICE.

Holders of water privileges, or those paying water rates, are hereby notified that the hours for irrigation purposes are from 6 to 8 o'clock a. m. and from 4 to 6 o'clock p. m.

ANDREW BROWN,
Superintendent Water Works.
Atty. by A. YOUNG,
Minister of Interior.
Hon. Jula, June 14, 189.
1244-1f

Notice to Corporations.

The attention of Officers of Corporations is called to Section 2024 of the Civil Laws of 1897, relating to the Annual Returns of Corporations, and also to the notice published from this Department under date of December 31st, 1899, requiring that Exhibits be filed on or before January 31st, 1900; and all Corporations who have not complied with said notification are requested to give the matter immediate attention, and file the Annual Statement required at this office.

ALEXANDER YOUNG,

Minister of the Interior.
Interior Office, Feb. 23rd, 1900.
1463-3f

Department of Public Instruction.

SCHOOL NOTICE.

The Board of Health having voted that the sanitary situation is such as to justify the opening of such Government Schools as the Department of Public Instruction might decide upon, notice is hereby given that the Honolulu Normal School (not including the Training School), and the High School (not including the Grammar Grades), re-open at 9 o'clock a. m. on Monday, February 26th.

By order of the Department of Public Instruction.

C. T. RODGERS,

Secretary.
1463-3f

Notice to Shippers.

In the matter of disinfection or fumigation of freight, shippers will make no distinction between that destined for points on the Island of Oahu and that destined to points on other Islands.

The original cases must be opened and the straw or loose paper wrapper or sawdust, or other packing material, removed from each bottle or tin; each bottle or tin is then to be dipped in an approved disinfecting solution; the interior of the original case is then to be washed cut with disinfectant; in repacking the already disinfected bottle or tin, no wrapper may be used unless same has first been fumigated or disinfected; the filled case is to be closed up and the entire exterior is to be disinfected.

In cases where the tinned or bottled goods have no loose paper or straw wrapping, or where they are not packed in sawdust or any similar substance, the entire original package, after two or more large openings have been made in it, may be dipped in a disinfecting solution; but great care must be exercised to insure the thorough disinfection of each tin or bottle, and the whole interior of the original package as well as the whole exterior surface of such original package.

Shippers having the interests of the entire Island community at heart will exercise very carefully every precaution, and assist rather than impede the efforts of the Board of Health, in preventing a further spread of Bubonic Plague in these Hawaiian Islands.

WILLIAM H. INGALLS,
Superintendent of Disinfection and Fumigation.
Honolulu, Oahu, Feb. 15, 1900.
1456-1f

REPORT ON FOODSTUFFS.

At a meeting of the Board of Health yesterday afternoon the prohibition of the Board on the introduction of foodstuffs was rescinded and the following resolution was unanimously adopted:

Whereas, in the opinion of the Board that by reason of the existence of plague in Asiatic ports, there is serious and continuing danger of the introduction of the same into the Hawaiian Islands, and that notwithstanding the quarantine defense, this danger is so increased by the introduction of certain foodstuffs from such countries that a suspension of the right to introduce the same is demanded, in the interests of public health;

Resolved, That the President of the Republic be requested, in pursuance of the power vested in him by law, to prohibit the introduction into the Hawaiian Islands of foodstuffs named in the schedule below written, from Asiatic ports, so long as plague exists in any of such ports:

Food products from the Orient may be divided into three classes according to the mode of manufacture and method of packing.

Two of these classes can be safely admitted into the country, even at times when the plague is epidemic at the port of departure, if certain precautions are observed. The third class cannot be admitted, and its importation should be prohibited at times when the plague is prevalent.

The first class would include all articles subjected to heat in the process of manufacturing and that are preserved in tins. The heating would destroy all germs and the outside of tins could, if necessary, be satisfactorily disinfected. Furthermore, it is doubtful if germs could live on the tin.

The second class would include all articles that are heated in the making but are afterwards dried and packed in wooden boxes. It is doubtful if germs will live in such substances. The containers can be satisfactorily disinfected.

The third class would include all dried and salted substances that are not heated in the preparation. They are usually packed in wooden boxes or matting. Germs might live on most of these articles and they could not be satisfactorily disinfected.

The accompanying list will show the classification of most of the articles imported from China and Japan.

A—Substances prepared in tins, heated in the process of manufacture and not capable of carrying infection. Containers capable of disinfection. Bamboo shoots, shrimps, bean curd and cake; all canned goods.

B—Substances that are packed in tins or cases, heated in process of manufacture and are not likely to carry infection. Containers capable of disinfection, and other unobjectionable articles: Bean sticks, bean flour, rice flour, sago flour, sago, macaroni, vermicelli, rice, beans, sugar.

C—Substances dried or salted in manufacturing, not subjected to heat and capable of carrying infection. In capable of being disinfected: Cattle fish and other dried fish, oranges, dates, lichees, nuts, fungus, duck, pork, sausage, dried meats, dried vegetables, cabbage, olives, birds' nests, eggs, mizo (cooked rice and beans), sea weed, mushrooms.

Fish Inspector Berndt has come across some very curious and beautiful fish lately which are being painted by KING BROS. artists. A very peculiar crab is on view in KING BROS. window, Hotel street.

THE BULLETIN can satisfy all your WANTS. It has established a WANT COLUMN.

Subscribers to the BULLETIN not receiving their papers promptly will confer favor by notifying the Business Office, Telephone 256.

WANTS.

Ads. in this column will be inserted at 10 cents a line per insertion; to cents second insertion; to cents a week and 40 cents a month. This is the cheapest advertising ever offered the people of Honolulu.

RULING ON SUGAR IMPORTS.

San Francisco, Feb. 2.—Collector of the Port Jackson received yesterday from Washington a number of important decisions relating to customs affairs. The most important has reference to the duty on sugars imported from a country where a bounty is allowed for sugar production. It was rendered by the Board of General Appraisers and construes the Congressional act of July 24, 1897, in such manner as to afford full protection for the sugar manufactured in this country.

The case before the Board of Appraisers grew out of an importation of German sugar received at Philadelphia. A discriminating duty equal to the amount of the German bounty was assessed upon the weight of the sugar as shown by the invoice. This assessment of duty was made in spite of the showing that the weight of the sugar had materially decreased during the voyage from Germany in consequence of drainage and evaporation.

The appraisers, in their decision, sustain the assessment of duty made by the Collector of Customs at Philadelphia. They hold that where a bounty is paid by a foreign government on the weight of merchandise exported to the United States and such merchandise loses in weight on the voyage of importation the additional duty is to be assessed on the weight of the merchandise at the time of exportation. The decision goes to the further extent of holding that the invoice weight is prima facie evidence of the quantity exported, and may be accepted as a basis for the assessment of additional duty. It is explained that in no other way can the purpose of the Congressional act be served and collection made of the discriminating duty in an amount equal to the bounty paid abroad.
